

New Zealand Programming Contest

REGISTRATION GUIDE – SCHOOL TEAMS

Eligibility Requirements

To register as a contestant for a school team, you must be a pupil at a secondary school in New Zealand, which includes a home school.

There are two types of school team.

1. A team where all contestants are from the same school. This type of team may win both the individual top award and the top school award.
2. A team where the contestants are from two or three different schools. This type of team may win the individual top award, but not the top school award.

Registration

To register, a team requires an adult team manager who is able to confirm that the contestants meet the eligibility requirements, and will undertake to pay the fee of \$30 for the team. A teacher or a parent would normally fill this role. This person may register as a team manager on the NZPC Website.

Contestants must also register with the NZPC at the start of the contest.

Teams

A team may contain up to 3 contestants. If space is limited at a site, teams with 3 contestants will be given priority over smaller teams.

Team managers may reserve space for their teams through the NZPC Website.
